

Virginie Grolleau

FULL-STACK DEVELOPER ALTERNATING

I'm a **web developer** with a strong **artistic** bent, specializing in **React**. My goal is to continue perfecting my skills and **deepen** my knowledge of the **back-end** side of things, to enable me to **adapt** even better within my future **team**, via a **work-study contract** for the **Full-Stack Java Angular Developer** training course with OpenClassrooms or the **Application Developer Designer** training course via ARINFO Niort. I've already had professional experience in other fields, so I'm familiar with the **soft skills** expected in a company.

WORK EXPERIENCE

STUDY PROJECTS
